DESIGN KITS

January, 2018

Bourns® Model H-1202 Standard Mini-Guitar Potentiometer Design Kit to be Discontinued

In continued support of the Professional Audio Market and to better serve our customers, Sensors and Controls is announcing the obsolescence of the Model H-1202 Standard Mini-Guitar Design Kit.

This kit is being replaced by two newly released design kits to provide customers with a better selection of parts specific to applications. The Model H-1202-1 Design Kit will contain non-switched mini guitar potentiometers, while the Model H-1202-2 Design Kit will contain guitar potentiometers with push-pull and push-latching switch options.

Obsolete Design Kit	Suggested Replacement Design Kits
H-1202	H-1202-1
	H-1202-2

Please plan for the following deadlines:

*Last time buy date: **March 1, 2018***

*Last time ship date: **March 30, 2018***

Should you have any questions or need additional information, please feel free to contact [Customer Service/Inside Sales](#).
